Subject: Bloomberg: EPA Ends Water Deliveries in Pennsylvania After Tests

The Environmental Protection Agency said it will terminate water deliveries for residents of Dimock, Pennsylvania, after a round of tests in the community found no unsafe levels of contaminants.

Residents in one area of that town had complained that their wells had been contaminated by nearby gas drilling using hydraulic fracturing.

"The sampling and an evaluation of the particular circumstances at each home did not indicate levels of contaminants that would give EPA reason to take further action," Shawn Garvin, EPA's regional administrator, said in a statement.
